

Colorado State University

CLIMATE INITIATIVE

By harnessing **world-class educators** and experts working on **all aspects of climate change**, Colorado State University is becoming a leading land grant institution for interdisciplinary **climate education, research, and engagement** in the United States.

AREAS OF FOCUS:

EDUCATION

Youth are leading the climate change movement and demanding change. Colorado State University is responding to this demand by becoming a leading educational institution developing undergraduate and graduate credentials to train the next generation of climate leaders.

RESEARCH

Colorado State University has world-class expertise across all aspects of climate change. We elevate and connect diverse research and innovation efforts across campus, including the Climate Adaptation Partnership, Soil Carbon Solutions Center, Energy Institute, Colorado Climate Center, Center for Environmental Justice, AgNext, and more.

OUTREACH & ENGAGEMENT

The CSU Spur Climate Hub will support climate tech incubation and innovation, entrepreneurial training, climate risk management analytics, and climate education for the surrounding community. The Climate Initiative is also working with other business and government leaders to serve Coloradans and our communities.
